...PERNES Jean Marc...............................................................  

I have the following potential conflicts of interest to report:

- Consulting
- Employment in industry
- Stockholder of a healthcare company
- Owner of a healthcare company
- Other(s)

- I do not have any potential conflict of interest
CORONARY ANGIOPLASTY TOOLS FOR BTK BIFURCATION LESIONS

BIFURCATION: HIGHER RISK OF RESTENOSIS AFTER ANGIOPLASTY
MANAGEMENT of BIFURCATION

State of the art:
T PROVISIONAL STENTING + KBI

General consensus

In most bifurcational lesions one stent is the treatment of choice!!!
The Nile PAX device incorporates a cobalt-chromium alloy with a side aperture in the mid-stent designed to optimize scaffold at the bifurcation carina and side branch (SB) ostium, while maintaining SB access during procedure.
DEDICATED CORONARY STENT FOR BIFURCATION

• MINVASYS:
  - Nile Croco: bare Stent
  - Nile Pax : DES : coating PACLITAXEL NO
IN some rare, particular lésions like bifurcation obstructions of BTK vessels, experience from coronary experience and tools may help!
